You are correct that the Tories are fuckwits. After |Parliament not passing any new laws for a few years due to the Brexit bollocks, the first thing the Tories did was pass "hate speech laws" and allow London police to use facial recognition. Like THAT was what we we were all waiting for.
There is a fucking good reason I don't live in the UK anymore. It's full of ugly, stupid, weak people that will gladly sacrifice liberty for "temporary" safety.
I'm not kidding, going back to the UK is like walking into 1984. There are signs everywhere saying that if you feed the ducks or smile at customs or eat ice cream in Hyde Park or pray to the Vatican on a tube station then you WILL go directly to hell (via prison) pay a £200 fine and will be decapitated by Price Charles. I'm being hyperbolic of course but when you visit most countries they have posters that show you the good things about said country, whereas in the UK they have posters telling you what you will be arrested for IF YOU BREAK THE LAW, together with posters that tell you that photography is forbidden (ironic in CCTVLand) if you take pictures of said warning posters.
Fuck the UK. It's a failed state. I'm a Bong but would rather live in any other country in the world than the UK these days. Press S to shit on grave.

Anonymous ID:YFW9BLvB Sun 05 Apr 2020 20:03:37 No.252152028 Report

Fresh from BD anon 1 post dispatch today:
"CoronaVirus. As I mentioned earlier the Chinese have decided to go for herd immunity and if they lose say 5 million no great loss. Having said that they did not understand the impact of the virus on such countries as India and the cross fertilization of the virus on third world countries. More importantly they underestimated the hardiness of the virus in their manufacturing chain. Simply letting their people die of the virus exposed their economy to massive poisoning. Chinese intelligence has determined, as leaked to my Russian friend in Syria, that 30% of products coming from China are infected with the virus. These products are circling the globe today and finding their ways into all commerce. In other words the Chinese can let their economy crash and burn and admit millions of folks are dying or they can cover the destruction up and pollute the world with poisoned product. Think about that as an added bonus with your next I-Phone. Now consider this in relation to Americans being called home.

Venezuela is really a beautiful country and has so much promise and it will be realized soon. Both the Russians and Chinese and other interested parties are all in for regime change. Back to work."

The tourism meme is indeed dying, and rapidly. I've unfortunately got many friends with many eggs in that basket, even a few eggs myself, but current events are forcing people to realize that it's not a sustainable enterprise.
Even fishing is catching a lot of flak at the moment for the number of people who come up from Washington to work our waters, not to mention all of the H1-Bs and illegals who work in the processing plants.

>big su dam
This one seems far off, politically speaking. That sort of infrastructure, as you know, could only be paralleled up here by the pipeline. There's nothing else in the area of that scale or with that level of environmental impact, and it'd be a tough sell for many in the state. I foresee a massive pushback from native interests unless they were the ones organizing and owning it -- in which case they'd be the biggest proponents.

Locusts.

It's about their globalist agenda. They want to run a prison planet of border-less, race-less, culture-less, identity-less, dumbed-down, easily controlled subdued sheep. They make up 1.4% of the US population and .0025% of the world's population, yet look at all they control from the world's finances to the media that brainwashes us.

In short, they use the entertainment and news media to encourage globalism and to discourage nationalism and traditional western values. They distort and lie about the past and present in that effort.

>corrupt tribal members
Unfortunately, anon, those are the only people that outside forces can reasonably do business with.
The process is approximately this:
>resources are in the hands of State/Feds
>regulations and public opinion both prevent govt from accessing or otherwise exploiting said resources

>Native corporations are exempt from most environmental regs, govt oversight, and taxation
>State/feds deed the land w/ resources to native corps headed by corrupt leaders
>native corps blunder their way through extraction, leaving all hell in their trail due to the lack of oversight and desire for expediency
>handful of natives line their pockets
>state cut out from tax revenue
>profit goes offshores
